DETAILED ACTION

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 9 is rejected under 35 U.S.C. 102(b) as being fully anticipated by Uchida (6424434).

Re claim 9, Uchida teaches for example in fig. 1 and 2, a member mounting apparatus comprising: an image forming lens unit (4); a holding member (2, 3, 8) for holding said image forming lens unit; a solid state image input (5) unit for photoelectric converting image focused by said image forming lens unit; a light source ("means for projecting"; col. 5, ln. 13-17); an image ("chart"; col. 5, ln. 13-17); for positioning adjustment illuminated by said light source for generating image to perform positioning adjustment of said solid state image input unit (col. 5, ln. 13-17); and a fixing operation

portion for performing positioning adjustment of image forming lens unit and solid state image input unit and for fixing said holding member and said solid state image input unit (col. col. 5, ln. 13-60); said image for positioning adjustment being focused on said solid state image input unit through image forming lens unit (col. 4, ln. 53-57); relative position of said image forming lens unit and said solid state image input unit being calculated based on photoelectric-converted focused data (col. 5, ln. 20-23).
